Technical Information

Becoming the leading company in CREATING LIVING SPACE that SECURES THE VALUE OF HUMAN AND ENVIRONMENT High quality surface finishing materials with L.E.A.D (Lifestyle • Eco • Advanced • Design)

Interior Film BODAQ

BODAQ is a decorative film with adhesive that is applicable on site.

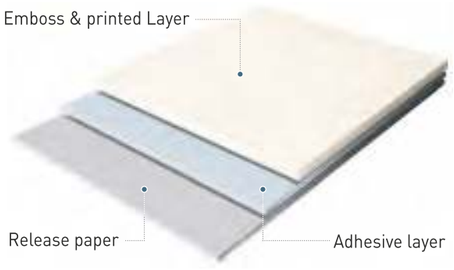

Recreate your world with BODAQ. It is an ideal way to finish many environments on site with little or no down time. BODAQ is used extensively for interior applications such as Hotels, corporate lobbies and elevators as well as exterior applications.
With its light weight and minimal thickness, BODAQ is a popular choice for cruise ship interiors.
BODAQ offers hundreds of patterns including solid color, abstract drawings and natural material replications such as wood and stone. BODAQ's original pressure sensitive adhesive ensures clean, fast installation on a variety of substrates. With its superior flexiblility, BODAQ can be installed on highly detailed and 3D surfaces.

Product Structure

BODAQ is a printed film with adhesive

1. Emboss & printed film layer(vinyl-chloride plastic)
2. Simplified adhesive(acrylic plastic)
3. Release paper

The above is a representative structure of BODAQ.
The actual structures and materials may be slightly different for each series.

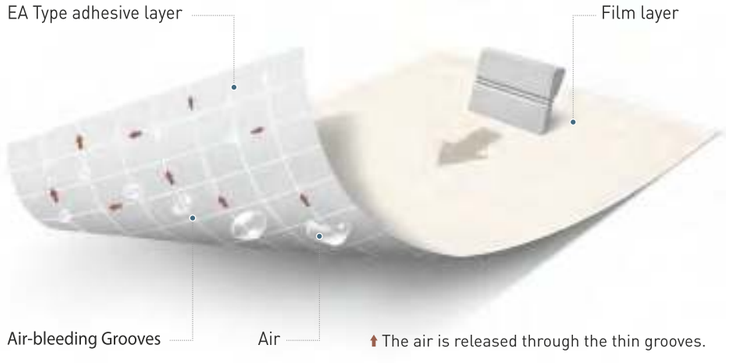

Easy to install with Airbubble control

BODAQ is applied using an Acryil type adhesive, which has an adhesive surface with grid grooves for air-bleeding Airbubbles between the film and the substrate.
The Airbubbles are released along these grooves, enabling the film to be quickly and easily affixed to large or complex surfaces.
This provides a higher quality finish.

Facilitates the release of air when the film is affixed, enabling easy application to large or complex surfaces.

Air bleeding Structure

The air is released through the thin grooves.

Enabling the film to be quickly and easily affixed.
